INTRODUCTION

This report presents final results of the 1956 Census dealing with the rural and urban distribution of the population of Canada. Tables are included to provide an additional classification of the rural segment to show the population living on farms.

The definition of rural and urban for the 1956 Census was substantially the same as that used in the previous Census of 1951. Briefly, the 1956 Census definition specified that all cities, towns and villages of 1,000 and over, whether incorporated or unincorporated, as well as all parts of census metropolitan areas and other major urban areas were to be classified as urban, and the remainder as rural. The difference from 1951 is that the fringe parts of other major urban areas were included with the rural in the earlier census.

The population shown as living on farms comprised all persons who were living in dwellings situated on farms in rural localities, regardless of their occupations. It does not include the increasing numbers of farm operators and their families who, particularly in the western provinces, were found to be residing in neighboring towns and villages at the census date, and thus were not considered as living on farms. Also, the figures do not include persons living on farms in urban localities.

A change in the composition of urban size groups was made for the 1956 Census. At the 1951 Census, each municipality located within the boundaries of a census metropolitan area was allocated to an urban size group according to its own individual size. In 1956, each such municipality was classified to the same urban size group as the total census metropolitan area of which it formed a part. In addition, the fringe parts of other major urban areas were included in the tabulations by size groups in the same manner.

INTRODUCTION

Le présent rapport donne les résultats définitifs du recensement de 1956 quant à la répartition rurale et urbaine de la population du Canada. Des tableaux sont inclus qui donnent un classement supplémentaire du segment rural et indiquent la population vivant dans les fermes.

La définition des termes rural et urbain au recensement de 1956 était sensiblement la même que lors du recensement antérieur, en 1951. En vertu de la définition de 1956, toutes les cités, villes et villages de 1,000 habitants et plus, constitués ou non, ainsi que toutes parties des zones métropolitaines et autres grandes agglomérations urbaines devaient être classés urbains et le reste rural. Elle diffère de celle de 1951, en ce que les secteurs périphériques des autres grandes agglomérations urbaines étaient classés ruraux lors du recensement antérieur.

La population indiquée comme vivant dans des fermes comprenait toutes les personnes habitant des logements situés dans des fermes dans des localités rurales, sans égard à leur profession. Elle ne comprend pas le nombre croissant d'exploitants de ferme et leurs familles qui, particulièrement dans les provinces de l'Ouest, demeuraient dans les villes et villages avoisinants lors du recensement et n'étaient donc pas considérés comme vivant dans des fermes. Les statistiques ne comprennent pas non plus les personnes vivant dans des fermes situées dans des localités urbaines.

La composition des groupes de taille urbains a été modifiée pour le recensement de 1956. Lors du recensement de 1951, chaque municipalité située dans les limites d'une zone métropolitaine de recensement était attribuée à un groupe de taille urbain suivant sa propre taille. En 1956, chacune de ces municipalités était classée dans le même groupe de taille urbain que l'ensemble de la zone métropolitaine de recensement dont elle faisait partie. En outre, les périphéries des autres grandes agglomérations urbaines étaient incluses dans les tabulations par groupe de taille de la même façon.

Tabulations of this information by size, tenure, and by an economic classification of farms are also shown in the reports. Additional tables provide data on certain aspects of farm expenditures and farm labour.

Chaque rapport contient des renseignements sur le nombre et la superficie des fermes occupées, le mode d'occupation, la superficie des cultures, le nombre de bétail, la production de laitages et le nombre de machines agricoles. Les mêmes renseignements sont aussi classés selon la grandeur, le mode d'occupation et la catégorie économique des fermes. Des tableaux sont ajoutés qui donnent des détails relatifs à certains aspects des dépenses et de la main-d'œuvre agricoles.

Results of the 1956 Census on Population and Agriculture are being issued as a series of reports, rather than as bound volumes. The reports are prepared so that by removal of the covers the tables can, if desired, be placed in loose-leaf binders or bound in volume form. In the latter case, Reports No. 1-1 to 1-21 would form the first volume, and Reports No. 2-1 to 2-11, the second. Introductory signatures and appendices will be issued on request to subscribers of the full series of population reports to complete the materials of this volume.

Les résultats du recensement de la population et de l'agriculture de 1956 sont publiés dans une série de rapports plutôt qu'en volumes reliés. Les rapports sont préparés de façon que, si on le désire, on puisse, en enlevant la couverture, placer les tableaux dans des relieurs à feuilles mobiles ou les relier en volumes. Dans ce dernier cas, les rapports 1-1 à 1-21 formeraient le premier volume et les rapports 2-1 à 2-11, le second. Une introduction et des appendices seront envoyés sur demande aux personnes qui s'abonneront à la série complète des rapports sur la population, ce qui complètera la matière de ce volume.
